Claim 17, line 2, after "provides" insert --previously recorded--.

Claim 22, line 6, after "transmitting" insert --previously recorded--.

REMARKS

Reconsideration of the above-identified application in view of the foregoing amendments and the following remarks is respectfully requested.

Claims 1-30 are pending in this application. By this amendment, applicant has amended the title of the invention, the detailed description, claim 1, claim 9, claim 17, and claim 22 in order to clarify what Applicant regards as his invention.

Claim Rejections – 35 USC § 103(a):

Claims 1-30 were rejected under 35 USC § 103(a) as being unpatentable in view of U.S. Patent No. 5,668,863 to Bieselin et al.

Bieselin teaches a method of providing an audio conference over a communications network and recording the conference for later *review* by its participants. This method works by setting "bookmarks" throughout the recorded material while the participants are recording the conference, such that they could later "skip to" these specific portions of the material on command during a *subsequent review session*.

The concept of the present invention, as defined by amended independent claims 1, 9, 17, 22, and independent claim 25, is a system which "bookmarks" a user's progress
